

## INTRODUCING GENESIS

Lab Support® - Run by Scientists for Scientists  
Since 1985

Lab Support®, a division of On Assignment, Inc., the nation's premier science and healthcare staffing services provider, is proud to introduce Genesis, an internship placement program designed to meet the evolving needs of the Lab Science industry while generating career opportunities for future science professionals.

### Championing the Dawn of a New Generation

The last 100 years has witnessed an incredible surge of groundbreaking, life-changing technologies. The next century holds even more potential, but only if a new generation of science leaders is ready to meet the challenge.

Your participation in Genesis supports a new generation by giving interns the opportunity to

gain valuable on-the-job skills and experience, helping them to become confident, science leaders. You also help foster a new league of professionals by offering candidates the invaluable opportunity to build life-long mentorship relationships while working shoulder-to-shoulder with industry experts.
